

## DISASTER RECOVERY AS A SERVICE

Whether you're impacted by a cyberattack, power outage, natural disaster, network outage, or any number of other situations that necessitate rapid recovery, business disruption doesn't have to wreak havoc on your organization. Disaster Recovery as a Service limits risk and exposure, giving you peace of mind that your company can recover from any incident. DataBank DRaaS is an effective, easily executable DR service that protects your IT environment, enabling your business to resume operations quickly in the event of an outage.

Ensuring continuous availability of data and applications doesn't have to be an expensive, time-consuming process. There's no need for your technical resources to set up and manage a duplicate production system in a secondary data center, or rely on backups at an off-site location.

### NOW THERE'S A BETTER WAY

	Traditional Backup	DataBank DRaaS	Active/Active
 RTO	Days/Weeks	As short as Minutes	Always On
 RPO	Typically 24 Hrs.	As short as Seconds	Always On
 COMPLIANT	Maybe	Available	Maybe
 SECURE	Maybe	Available	Maybe
 TESTED	Difficult	Easier	Easiest
 COST	Lowest	Lower	High

### THE DATABANK DIFFERENCE

- | COMPLIANCE   | SECURITY   |
|--|--|
| <ul style="list-style-type: none"> <li>• SSAE18</li> <li>• PCI-DSS</li> <li>• HIPAA</li> <li>• HITECH</li> <li>• FedRAMP</li> <li>• ITAR</li> <li>• NIST 800-53</li> <li>• FIPS 140-2</li> </ul> | <ul style="list-style-type: none"> <li>• FIREWALL</li> <li>• IDS/IPS</li> <li>• SCANNING</li> <li>• 24x7 MONITORING</li> <li>• WAF</li> <li>• 2-FACTOR AUTH</li> </ul> |

With 550TB and 2,000 applications under management, more than 2PB of storage is dedicated to our Data Protection solutions. DataBank offers multiple levels of service to integrate with your business operations.

### More cost effective than active/active. Better outcomes than backup.

Nothing beats active/active in terms of uptime, but the cost isn't realistic for most companies. DataBank DRaaS enables the ability to set your own RTOs and RPOs, no matter how critical your needs. We help businesses achieve near active/active outcomes for a fraction of the cost, backed by an expert engineering team, proven methodologies, compliance, security, and 24x7x365 support to ensure your uptime meets our SLA and exceeds your expectations.

## HOW OUR DRaaS WORKS

### Geo-Diverse Replication\*

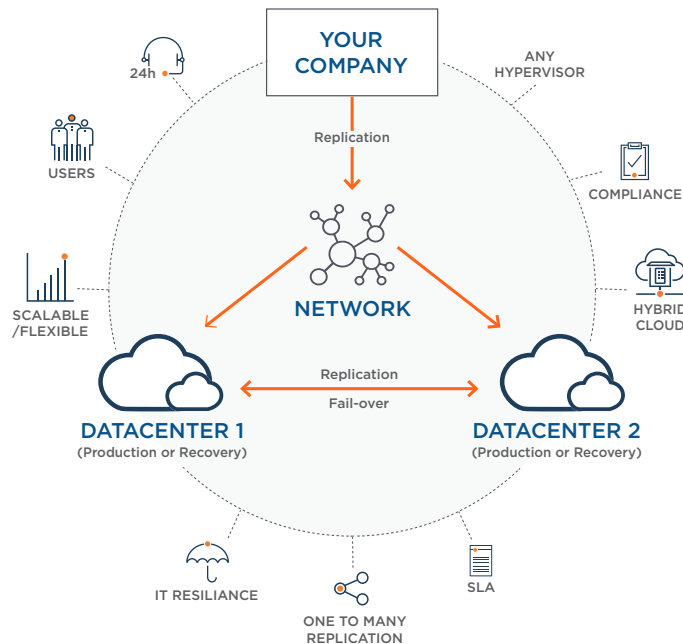

Replicate from primary to secondary data centers

### Enterprise Connectivity

Transit, transport, and Cloud Connect options

### Compliance

Meet the most stringent compliance requirements

### Enable Hybrid IT

Colocation options in SSAE18 SOC 2 data centers

### One to Many and Any to Any

Replicate any hypervisor/host to secondary and/or tertiary data centers

### Security

Multiple encryption and Managed Security options

### Why DataBank?

DataBank delivers the critical uptime of data, applications and infrastructure that all companies demand including many of the world's Fortune 500. Because resiliency is at the core of everything we do, the DataBank DRaaS platform is the right choice for ensuring the survivability of your business.

#### Included

- Resource pool (CPU, MEM, DISK)
- Replication software and IP addresses
- Compliance checklist and run books
- 24x7x365 management and monitoring ensures system and business continuity
- Flexible RTO and RPO service plans
- 1 annual DR test

#### Optional

- DRaaS solutions available for a full range of compliance mandates, including PCI DSS, SSAE 16 & 18, HIPAA HITECH, FISMA, and FedRAMP
- Geo-replicated workloads protect against data loss and ensure compliance
- Encryption in transit and at rest ensures security of enterprise data
- Connectivity, firewall, and managed security
