

DATA PROTECTION SOLUTIONS

COMPLIANT REPOSITORIES WITH DATABANK CLOUD CONNECT

EASY, COMPLIANT BACKUP RETENTION AT THE PUSH OF A BUTTON

Backups are a critical component of your IT operations. Yet, handling backups internally is one more thing for your IT team to worry about, including hardware, storage, and potential considerations for managing a remote site. DataBank Cloud Connect allows existing Veeam™ customers, including on premise, cloud, or colocation, to move or copy virtual and physical server backups to DataBank's off-site storage repositories without the cost and complexity of building and maintaining an offsite infrastructure.

Enabling Secure and Compliant Repositories

The ability to maintain secure off-site backups for data at rest is critical for compliance, which is why this capability is built into our offering. DataBank Cloud Connect provides a fast, easy and secure repository for storing off-site and cloud-based backups that protect against data loss. It's easy to make changes directly from your existing Veeam console using a simple, consumption-based pricing model.

Backup repositories are hosted in DataBank state-of-the art, purpose-built facilities. You can trust in a data center provider that supports FIPS 140-2 security, as well as a multitude of compliance mandates, including FedRAMP, FISMA, SSAE 18 SOC1 and SOC2, HIPAA/HITECH, PCI-DSS, and Privacy Shield-GDPR.

Get Your Data Off-Site and Unburden Your IT Staff

A turnkey solution for compliant repositories

No added burden for IT departments

Forgo the cost and complexities of operating a secondary data center

Capital cost for storage transform into a predictable monthly expense

THE DATABANK DIFFERENCE

COMPLIANCE

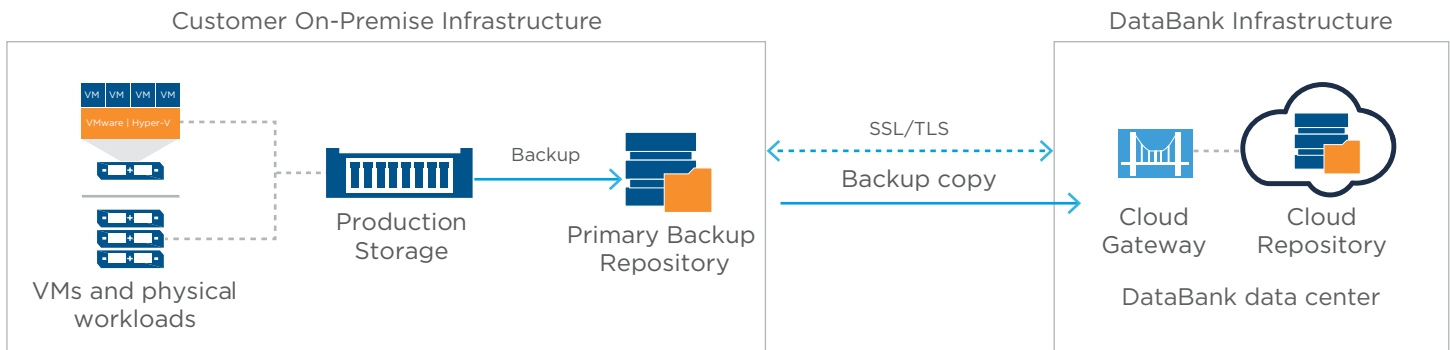

- SSAE18
- PCI-DSS
- HIPAA
HITECH
- FedRAMP
- ITAR
- NIST 800-53
- FIPS 140-2

SECURITY

- FIREWALL
- IDS/IPS
- SCANNING
- 24x7
MONITORING
- WAF
- 2-FACTOR
AUTH

With more than 400 blades, 8000 cores, and 9 PB of storage under management across four geographies, you can rely on our scale, tools, and talent to ensure your applications are globally available, protected, performant, compliant, and secure.

HOW IT WORKS

DataBank Cloud Connect makes backups as easy as the push of a button and eliminates the need for hardware. You can simply sign up and initiate use instantly in the native management console you're already using. DataBank Cloud Connect provides a fully integrated, fast and secure way to perform backups to DataBank data centers by providing a remote Veeam backup repository accessible from within your existing Veeam backup solution.

Included

- Hosted repository on demand
- FIPS 140-2 encryption at rest ensures security of enterprise data
- Holistic view of your hosted backup environment via Veeam console

Optional

- Data protection solutions available for a full range of compliant systems, including FedRAMP, FISMA, SSAE 18 SOC1 and SOC2, HIPAA/HITECH, PCI-DSS, and Privacy Shield-GDPR.
- Geo-replicated facilities protect against data loss and ensure compliance

Why DataBank?

DataBank is a leading provider of enterprise-class data center, cloud, and connectivity services, offering customers 100% uptime availability of data, applications, and infrastructure. DataBank's managed data center services are anchored in world-class facilities that cater to today's network and computing edge - users and applications in dense but underserved markets.

DataBank provides its suite of services in a truly hybrid model allowing enterprises to port workloads, technologies, and even contract terms from data center to data center and from cloud to colocation, with compliance certifications to meet the most stringent demands. By evolving the data center experience in this manner, our customers can more effectively manage risk, improve technology performance, and focus on growth.
