

MANAGED CLOUD

DATABANK'S NEXT GENERATION CLOUD PLATFORM

DataBank's Managed Cloud is an advanced high-performance computing and storage platform designed from the ground up with security and compliance in mind. Deployed inside DataBank data centers, our Managed Cloud allows enterprise clients to easily integrate their colocation assets and workloads into a true hybrid solution.

Discover our next generation, high performance private and virtual private managed cloud platforms, built for enterprises who want maximum performance and compliance with the flexibility of seamlessly integrating colocation and managed security as needs evolve.

THERE'S A BETTER CLOUD IN YOUR FUTURE

	Traditional do-it-yourself	DataBank Cloud	Public cloud
 Private	Yes	Yes	No
 Network Access	Maybe	Yes	Maybe
 Compliant	Maybe	Available*	Maybe
 Secure	Maybe	Available*	Maybe
 Cost	Highest	Lower	Lowest

THE DATABANK DIFFERENCE

COMPLIANCE

- SSAE18
- PCI-DSS
- HIPAA HITECH
- FedRAMP
- ITAR
- NIST 800-53
- FIPS 140-2

SECURITY

- FIREWALL
- IDS/IPS
- SCANNING
- 24x7 MONITORING
- WAF
- 2-FACTOR AUTH

With more than 400 blades, 8000 cores, and 9 PB of storage under management across four geographies, you can rely on our scale, tools, and talent to ensure your applications are globally available, protected, performant, compliant, and secure.

The Foundation of a True Hybrid Strategy

To enable a true hybrid strategy, your cloud needs to extend beyond the average, scalable compute & storage platform, it should offer the performance, security and compliance needed to handle mission-critical production workloads. It should also integrate with existing colocation solutions, and include revenue portability between platforms. Not to mention, a complete suite of managed services should be part of the package to free your IT staff when needed. This is how DataBank is evolving the data center and the cloud experience.

DATABANK'S MANAGED CLOUD PLATFORM*

Monitoring

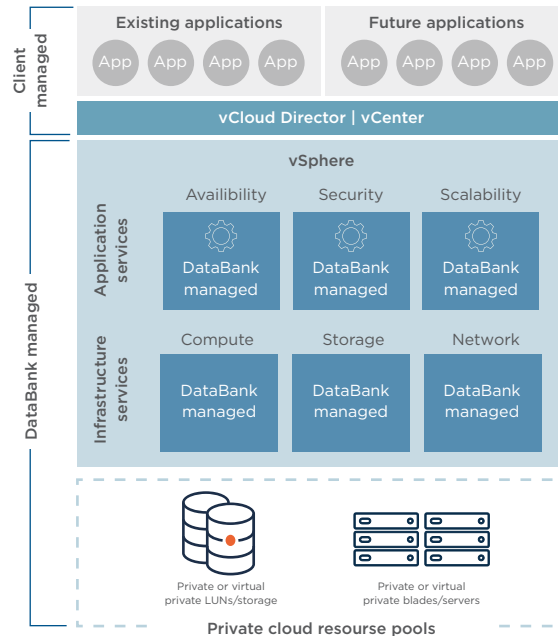

Comprehensive 24/7/365 monitoring of servers, applications, performance counters, application dependencies, hardware, performance, and security for alerting and capacity planning.

Recovery

We are your "first responders". The DataBank team owns alarms including escalation to third parties. We solve 95% of issues so you don't have to.

Tech Support

Included for all customers. No per incident charges.

Patching

Keeping your servers' operating systems patched is essential to your environment's security.

Backups

Backups built to fit your needs, ranging from basic local backups, to off-site replication, complex retention strategies or full DRaaS.

Security

Individual security components include IDS/IPS, DDoS mitigation, firewall, WAF, FIM, log offloading, Vulnerability scanning, dual and multi-factor authentication, and other enhanced security services.

Included:

- Internet
- Virtual firewalls
- Resource pool (CPU, MEM, DISK)
- Virtual private servers
- VMware virtualization software
- Multi-tier storage with data encryption
- 24x7x365 monitoring/portal

Optional:

- SPLA OS licensing
- DDoS mitigation
- Private firewalls
- Private servers/blades
- Private storage
- Load balancing
- Private transport cross connects
- Disaster Recovery as a Service

- File integrity/log management
- Two-factor authentication
- Vulnerability scanning
- Web application firewall
- Antivirus
- Host-based intrusion prevention

Why DataBank?

What makes DataBank the ideal partner for a hybrid IT strategy? 100% uptime availability of data, applications, and infrastructure, extensive compliance certifications, and the ability to port workloads and contracts between data centers and platforms.

**Managed Cloud platform, compliance, and security options available in select data centers*
