

## Managed Anti-Malware

# PROTECT AGAINST UNKNOWN MALWARE, EXPLOITS, AND RANSOMWARE

Anti-malware protection plays a fundamental role in any enterprise security strategy and provides strong first-line of defense in stopping malicious activity before it enters your network. Cybercriminals are adapting their methods and increasingly launching more sophisticated attacks such as Ransomware to evade detection. To keep up with evolving threats, your hosted infrastructure needs an anti-virus solution that offers best practices as well as best technologies.

## Comprehensive Exploit Prevention

DataBank's Managed Anti-Malware provides comprehensive exploit prevention by blocking the techniques used to distribute malware, steal credentials, and escape detection, allowing your organization to ward off evasive hackers and zero-day attacks. You gain confidence that your organization is protected by a best-of-breed solution with real-time protection, 7x24x365 support, and centralized insight to detect and stop malware exploits and ransomware.
