Cloud Connect

EASY, COMPLIANT BACKUP RETENTION AT THE PUSH OF A BUTTON

Reduce Cost and Complexity

Backups are a critical component of your IT operations. Yet, handling backups internally are often complicated and costly. These tasks are unnecessarily burdensome to your internal IT team, and one more thing for them to worry about when they have more important workstreams to complete while maintaining your mission-critical operations. DataBank Cloud Connect allows existing Veeam™ customers, including on-premise, cloud, or colocation, to move or copy virtual and physical server backups to DataBank's off-site storage repositories without the cost and complexity of building and maintaining an off-site infrastructure.

Enable Secure and Compliant Repositories

The ability to maintain secure off-site backups for data at rest is critical for compliance, which is why this capability is built into our offering. Backup repositories are hosted in DataBank's state-of-the art, purpose-built data center facilities and enable a fast, easy, and secure repository for storing off-site and cloud-based backups that protect against data loss. It's easy to make changes directly from your existing Veeam console using a simple, consumption-based pricing model.

AT-A-GLANCE

- Hosted, on-demand repository
- FIPS 140-2 encryption at rest
- Easy add-on to the Veeam console and solution you already use
- Supports and enables compliance mandates including FedRAMP, HIPAA/HITECH, PCI-DSS, SSAE SOC 1 and SOC 2

# KEY BENEFITS

QUICK AND EASY DEPLOYMENT

ENABLES COMPLIANCE

PREDICTABLE MONTHLY EXPENSE

ELIMINATES SECONDARY DATA CENTER COST

Cloud Repository

DataBank Cloud Connect makes backups as easy as pushing a button and eliminates the need for hardware. You can simply sign up and initiate use instantly in the native management console you're already familiar with. DataBank Cloud Connect provides a fully integrated, fast and secure way to perform backups to DataBank data centers by providing a remote Veeam backup repository accessible from within your existing Veeam backup solution.

Features

- Deploy within your existing Veeam console
- Hosted, on-demand repository
- Integrated with Veeam console
- Includes physical data center facilities, cloud storage platform, and 7x24x365 operations support
- Revenue Portability
- DataBank Portal

Benefits

- Ensures quick and easy deployment
- Unburdens your IT staff from management tasks
- Leverages what you're already familiar with
- Provides a holistic view of your backup environment
- Reduces burden on IT Department
- Transforms capital cost of backups into a predictable monthly expense
- Eliminates the cost and complexity of operating a secondary data center
