

Multi-Factor Authentication

SECURE ACCESS TO YOUR APPLICATIONS AND DATA

Gain Trust In Your Users

Confirming the identity of users before they access your critical applications and data is an absolute necessity for securing your Hybrid Infrastructure. DataBank's Multi-Factor Authentication solution adds an additional layer of access control to your hosted IT systems by making sure your users are who they say they are and protecting you against phishing and other threats.

Create a “Zero Trust” Security Platform

DataBank's Multi-Factor Authentication platform can confirm any user on any type of device, anytime, and anywhere. This allows you to create a true “zero trust” security profile where all users — whether inside or outside your infrastructure — must be verified. It also provides the endpoint visibility you need to get control of devices and the policy management you need to maintain compliance. DataBank's solution is supported by a dedicated staff of security engineers and a seasoned CISO, 7x24x365.

SOLUTION AT-A-GLANCE

- Mobile Authentication (iOS, Apple Watch, Android, BlackBerry and Windows phones)
- Supports cell phones, landlines, and hardware tokens
- Push Notifications
- TOTP (time-based one-time)
- Security Checkup Feature
- Restore
- Touch ID and Web Authentication

KEY BENEFITS

DETERS ATTACKS

SIMPLIFIES COMPLIANCE

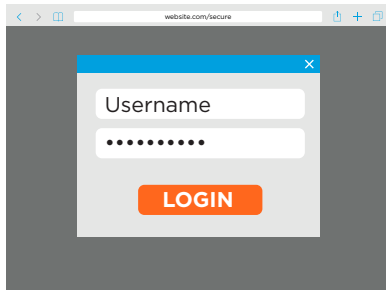

SCALES TO MEET DEMAND

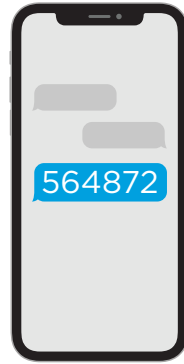

MAINTAINS SECURITY POSTURE

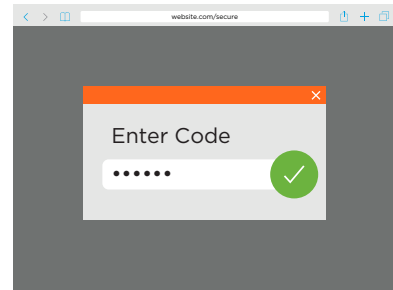

HOW IT WORKS

The user enters in their username and password.

An authentication code is sent to the user's mobile device.

The user enters in their authentication code to log into the application.

Features

- A simple, streamlined login experience
- Integrates easily with existing technology
- Immediately neutralizes the risks associated with compromised passwords
- Actively involves users in the process of remaining secure
- Use of authenticator app vs. passcodes, tokens, and callbacks

Benefits

- Deters modern phishing attacks by verifying identity in seconds
- Simplifies compliance requirements for FedRAMP, PCI-DSS, and HIPAA/HITECH
- Protects any application on any device
- Scales to meet even the fastest growing environments by simplifying the user experience
- Helps maintain a strong, secure and flexible security posture

WHY DATABANK?

OUR APPROACH

We are your trusted partner committed to getting you the optimal solution to meet your business objectives

SECURITY

Our dedicated security and compliance teams lets us achieve the most stringent regulatory certifications for our facilities and solutions

ACCOUNTABILITY

We are straightforward, thoughtful, and resolute in our pursuit of better customer experiences and business success

SERVICE

Datacenter staffed 24/7/365 with U.S. based responsive support engineers. Proactive service methods takes the burden off your team
