

DataBank's Next Generation Cloud Platform

PLATFORMS

Managed Enterprise Cloud

More Freedom to Be Strategic

With the rapid shift to the Cloud comes the increasing complexity of managing the platforms which requires operational expertise that is in short supply. In the past, it was easy to retrofit common security, governance, management, and monitoring layers. Today, conditions are different. Your IT staff must work smarter by leveraging experts who manage Cloud infrastructure every day to ensure security and compliance for your mission-critical application workloads. Leveraging management expertise from DataBank gives you more freedom to be strategic, producing better long-term outcomes.

Maximum Security, Compliance, and Management

DataBank's Managed Cloud provides a rich envelope of services that free your staff from management complexity and augment your existing expertise. Our managed services include monitoring, recovery, 7x24x365 tech support, patching, backups, and an array of Managed Security options to keep you safe and compliant. DataBank's Managed Cloud is built for enterprises who need maximum security, compliance, management, and performance for mission-critical enterprise applications.
